Bake in

- · Setup and maintain Cloud infrastructure in AWS using Terraform, Terragrunt & Atlantis
- · Deploy application services in Kubernetes using FluxCD for GitOps
- · Use Rancher as the Kubernetes
- management and monitoring tool for devs · Implement Incident management, APM,
 - Database and Log monitoring with Datadog
- · Maintain and monitor AWS Aurora Postgres Database to maximize performance while reducing cost
- · Setup Cloudflare Zero Trust to protect internal application and services

PROJECTS.

Sanddollar

The world's first retail central bank digital currency (CBDC). Help setup on-prem servers, one for the main site and another for disastar recovery. Connected the two via Site-to-Site VPN using Pfsense OpenVPN Protocol https://sanddoilar.bs

Ansible Role Astar Network

- An open source Ansible Role available on Ansible Galaxy Repository that installs an Astar
- full / archive / collator Node on Linux https://github.com/asyrafnorafandi/
- https://github.com/asyrafnorafandi/ ansible-role-astar
- Defichain Metachain Blockscout Deployed a Blockscout explorer for Defichain's Metachain EVM
- https://blockscout.mainnet.ocean.j
- Kelab Santai Antara Sahabat)
 Helped my local Table Tennis
 Sports Club to develop and host a
 website to increase online
 presence. Registered Google
 Business to help users to find and
 locate the Clubs location.
 https://ksa.com.my

- Involved in the process of getting Bake ISO27001 certified
- Setup Github action pipelines for SAST, code linting and unit testing using scanning tools such as Terrascan, Semgrep. Trufflehoo. and Checkov.
- Involved in Backend/Frontend debugging of ReactJS and NodeJS frameworks

Web3

- Manage 100+ Ethereum / Dash / Defichain Masternode servers using Ansible
- Setup monitoring for Blockchain nodes using Prometheus and Grafana
- Use Terraform to setup multiple nodes in different regions in AWS/Linode
- Setup Blockscout explorer for Defichain's EVM layer
- https://blockscout.mainnet.ocean.jellyfishs dk.com
- Deploy and maintain Defichain's Ocean
 API + Indexer for DFI Jellyfish Lightwallet
